

ENTRE LA CONCLUSIÓN Y LA CORRECCIÓN: PATRONES DE
PROCESAMIENTO EXPERIMENTAL CON EYE-TRACKING A PARTIR
DEL MARCADOR *O SEA* EN ESPAÑOL

ABSTRACT

This paper explores conclusion and correction expressed with/ without *Sp.* reformulation marker “*o sea*”. Some researchers argue that conclusion and correction are subtypes of reformulation because they share the same reformulation markers. This has been called form-function trap (Pons 2013, 2017). As a result, limits between functions get blurred. Drawing from an experimental eye-tracking analysis based on contexts with and without reformulation marker, a distinction is proposed between conclusion and correction: if these functions were subtypes of reformulation, they should thus show similar processing patterns. Results show clear differences.
